

Where Technology boosts success

intelliSoft Lebanon is a Lebanese IT Solutions Provider, whose mission is to deliver Innovative Integrated Business solutions addressed to Small and Medium Enterprises.

intelliSoft relies on senior marketing, product and sales executives with extensive experience in enterprise software, document management and professional services.

Intellisoft focus on three key business area

SOFTWARE DEVELOPMENT

Software Development is focused on the development of customizable commercial business applications and client-specific software solutions. Our Custom Application Development includes an initial assessment of customer needs, the development of a custom automated solution, the implementation and a support plan that insure the system is running smoothly.

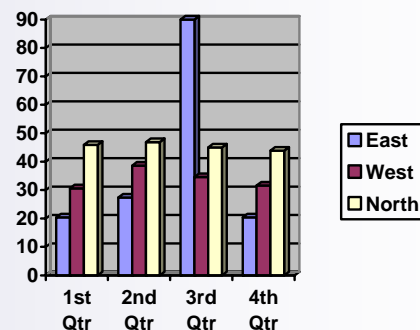

IntelliSoft Methodology is to work with clients through the entire project cycle, from basic strategy layout, design and implementation to deployment and maintenance. While maintaining high standards of professionalism and efficiency to ensure that projects are implemented on time and on budget.

Our implementation methodology is based on key project planning elements such as: goal-directed, planned, evaluated and result-oriented. The implementation will follow three 'Phases' which are: Mapping of customer business processes to the proposed System, Piloting: Comprehensive process testing and training in real data test company and Migration: Complete simulation of the use of the proposed software

IntelliSoft offers Ready-made Customizable packaged systems such as:

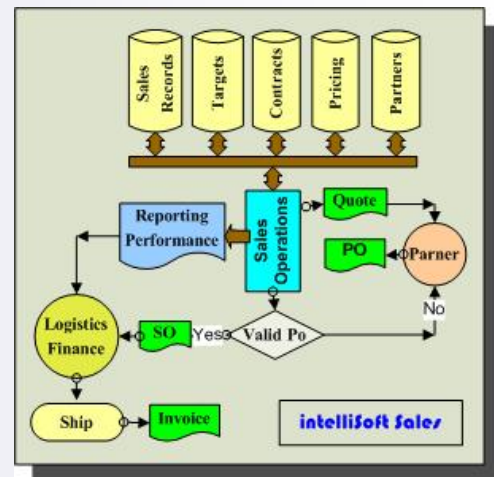

INTELLISOFT FINANCE

intelliSoft Finance is a complete financial system designed for small and medium enterprises. The system provides a traditional accounting system as well as a set of rich financial reports and statistics. The heart of the system is a dynamic, structured and multi-dimensioned Chart of Accounts that permits full integration of the General Ledger with the various modules of the system: Accounts Payable, Accounts Receivable, cash management, Payroll and Inventory. Control is provided through Journals, voucher registers, and comparative reports. The system uses a friendly user interface, making easy to operate. Invoices, receipts, payment vouchers and many other business documents are generated by the system and can be printed on a laser or dot matrix printer, plain or pre-printed form.

INTELLISOFT SALES

intellisoft Sales is a full Sales Process Automation System that helps sales persons and managers, monitoring their goals and their customers performance. Besides providing automation of the sales process, the system offers powerful tools to manage all aspects related to the process such as Contacts, Customers Contracts, Opportunities, Pricing, Customer Orders validation and sales activities, making the application an efficient knowledge management. The system provides a variety and rich reports, such as sales analysis, Salesperson, customer and company performance and a set of statistical Reports, allowing the company to have an accurate knowledge about its sales operations

INTELLISOFT SERVICES

intellisoft Services (SOS- Service Operations Systems), designed for companies who need to manage their maintenance operations and services contracts. The system allows companies to handle: Customer Calls Logging, Field service operation control and management, Service Contracts Management, Parts control and inventory. The system offers a variety of standard report showing performance keys by Engineer, Brand and company. SOS is compliant to most standards used by international service companies. A solution is ready for IT companies and could be customized for companies of other sectors.

THIRD PARTY SOLUTIONS

Print Management Control

Our Print Management Control solution is based on Print Manager Plus from Software Shelf International. The System tracks, controls and reports printing usage and costs across networks.

intellisoft offers a State-of-Art Examination Platform (EXPLA) from Christiani. Based on a Huge Questions Bank, the System helps companies conducting entrance, intermediate, or final examinations. Millions of candidates have been examined during the recent years with the help of our software.
